EXPERIENCE

Center for Applied Systems and Software   March 2016 - Present
Junior Software Developer

Worked in agile development teams as a student developer on projects for the Oregon Department of Transportation and SmarterBalanced.

CLUBS & PROJECTS

American Society of Mechanical Engineers   Winter 2016 - Winter 2017
WebMaster

Maintained and updated club website.

NASA University Student Launch Initiative   Fall 2017 - Spring 2018
Rover Programmer

Designed and programmed the software of the OSU USLI competition rover while conducting educational outreach sessions with local schools and maintained the team website.

Oregon Department of Transportation   Spring 2016 - Summer 2017
TOCS Resource Management

Maintained, refactored, and updated the Transportation Operations Center System code base. This system coordinates emergency response teams to decrease response times for accidents and other disasters.

SmarterBalanced   Summer 2017 - Present
AP_ScoringGuide

Refactored and added features for the SmarterBalanced website used by teachers across the United States to compare individual students' performance on a national level.

React-Advanced-Filter   Fall 2017

Created and optimized an NPM downloadable React component used for filtering results from search queries.
